# FLOOD IN THE NEW R. T. TUNNEL BROKEN MAIN POURS IN 500,000

Scaffolding Swept Away, Gas Main Smashed and 825,000 Damage Done Near Lafayette Place - Nearby Cellars Are Swampd-The District Waterless Four Hours.

GALLONS OF WATER.

The excavation for the Rapid Transit unnel at Great Jones street and Lafayette place was flooded with 500,000 gallons of yesterday morning by the bursting of a 12-inch water main connecting with nch main. The water also poured nto the basement of the mission of the Immaculate Virgin on the southeast corputting out the kitchen fires and 400 had to go without their breakfasts food could be got from restaurants in neighborhood. Holbrook, Cabot & Daly, the contractors who are building section of the tunnel, said that their work had been damaged to the extent of

The break occurred about 5:40 o'clock. It was discovered by some porters who were on their way to work in a Broadway store. They heard a loud roar and then a column of water shot out from the broken main, pounding on the concrete wall on

main, pounding on the concrete wall on the west side of the excavation. The 12-inch branch main had broken close to where it was joined to the 36-inch main. It is thought that the main had not been properly supported and had sagged.

The tunnel is about seventy-five feet wide at this point and excavation had been made about nine feet under the pipes. This rapidly filled with the water, which gushed from the broken pipe at the rate of 8,000 gallons a minute. There are three gas mains and an electric conduit running through Great Jones street at this point. One of the gas mains, a 12-inch pipe, too, burst after the beams which had supported it had been carried away by the rush of thad been carried away by the rush of water. The pipe dropped to the bottom of the tunnel and it wasn't long before there was an overpowering smell of gas in the neighborhood.

All the timber and scaffolding in the tunnel was contactly around in a min-

tunnel was sent swirling around in a min-lature lake. A bridge used for a roadway over the excavation was carried into the excavation and a colony of rats went scur-

rying in all directions.

The firemen of Engine 33 in Great Jones The firemen of Engine 33 in Great Jones atreet were first summoned, but they could do nothing and a policeman notified the Water Department. The Gas Company sent a repair gang and it wasn't long before the gas pipe had been plugged with collapsible bags and that leak stopped. The men from the Water Department had some difficulty in shutting off the water. It was finally decided to shut off the trunk main and after a hunt, the water gate at Macdougal and Fourth streets was found and closed. More than an hour passed, though, before the water was shut of the collection. dougal and Fourth streets was found and closed. More than an hour passed, though, before the water was shut off entirely. In that time the engineers estimated that about 500,000 gallons of water had been wasted. By 10 o'clock the broken main was capped and the water in the trunk main turned on again. The neighborhood was without water for about four hours.

Except for the basement of the Immaculate Virgin Mission, the buildings fronting on the excavation were not damaged, as on the excavation were not damaged, as the walls are of concrete and are water-proof. The water rose in the kitchen of the mission until the pots and pans were floating around.

### WHO SHOT COP'S PRISONER? Court Inquiry Doesn't Make It Very Clear -He Says Police Did.

Magistrate Cornell in the Essex Market police court took up yesterday the case of Thomas Cominsky, accused of an assault on Policeman Burns of the Madison street station. Burns went to Seward Park on Wednesday of last week and while trying to clear it of a gang of toughs was knocked down with a club from behind.

Cominsky was arrested the next night Rivington and Goerck streets. Somehow in being arrested he received a bullet wound is tence the new Cambria Steel Company in the leg and another in the head. The with a capital of \$50,000,000, and, in accordpatrolmen's story of this is that there was ance with the call, the subscribers will absence of investment buying, except a general mix-up in which the man was shot by the crowd. Cominsky says that he was sitting alone in a doorway drinking beer and was shot by the policemen withbeer and was shot by the policemen withthe capital of the new company consists

The capital of the new company consists

The capital of the new company consists out prevocation. Yesterday's examination, while technically directed against Comineky for assault, in reality took the form of an inquiry as to how he came by his bullet wounds. Assistant District Attorney Herwounds. Assistant District Attorney Her-

man examined the witnesses.

Roundsman Kelly said that he was at Gouverneur Hospital when Cominsky was brought in after his arrest, and he heard him say he didn't know who shot him. Kelly said he examined the revolvers of the two policemen, and found Corbett's fully loaded. O'Farrell's admitted having fired one shot in the air to disperse the crowd. In the station, Kelly said, he heard the sergeant ask Cominsky if the officers had shot him, and Cominsky had replied that he couldn't tell.

CHIEF AND POSTMASTER CLASH

Over the Firemen's Teurnament—Each Gets Out Warrant for Other.

PORT JEFFERSON, L. I., Aug. 15.—At a recent meeting of the committees appointed to arrange for the firemen's tournament to be held in this village shortly Chief Charles A. Bayles and Postmaster

that he couldn't tell.
"Why should the sergeant ask him if
the officers had done the shooting?" inquired the officers had done the Mr. Herman.

"Well, there had been rumors to that effect," said Kelly.

"Rumors? Where did the rumors come of the people."

Harry Abrams, 53 years old, a cab driver of Coney Island, was beaten and robbed Three-Year-Old Boy Accused of Breaking by two men who engaged him to drive them from the island to Ulmer Park shortly after 2 o'clock yesterday morning. A bridge which crosses Coney Island Creek, according to the story told by Abrams, both men set upon him and threw him from his seat into the bottom of the

### WHEAT ESTIMATES SMALLER. Progressive Decrease Shown in the Last Turee Months.

WASHINGTON, Aug. 15.- A telegram from Budapest to the Agricultural Department gives in millions of hectolitres the official estimate of the crops of wheat, rye and barley for Aug. 10. The following table shows, in thousands of Winchester bushels, this latest estimate, in comparison with the estimates that were made on July 10, and on June 10, respectively, and also in comparison with the approximate official figures for 1900:

Higures for 1900:

\*\*Estimate: for 1901 at date: named.\*\* Crop of Crops.\*\* A to: 10. July 10. June 10. 1900.\*\* Wheat.\*\* 127,696 5 130,534 2 133,371.9 140,300 Ryc... 45,403.2 45,403.2 46,522.0 44,300 Barley. 46,822.0 45,403.2 46,522.0 52,300 Oats.\*\* Approximate figures obtained from a statement of the crop of 1900 by weight.

It will be seen that there has been a pro gressive decrease in the estimates for wheat, the last estimate being lower than either of the preceding ones and it is also lower than the estimate for July 20.

The official estimate for rye on July 20, as The official estimate for rye on July 20, as given in detail in the Pester Lloyd, was slightly higher than that of July 10. The fact that no such increase appears in the figures just received by cable may be due to its not being large enough to show in a statement given in round numbers only.

The official estimate for rye on July 20, as a single fact that the single fact that the state of th

not being large enough to show in a statement given in round numbers only.

The figures given for barley are somewhat higher than those for July 10, but identical with those for June 10.

The estimate for Aug. 10 does not include any new figures for cats, but the estimate for July 20, as given by weight, showed an increase of 8 2-3 per cent. over that of July 10. Such an increase over the figures for July 10, as given above in Winchester bushels, would make the estimate for July 20 about 64,400,000 bushels. The estimate for that date is the last one at hand. It is higher than those for the earlier dates, but not high enough to bring the figures for this year's oat crop to a level with those for the crop of 1900.

It should be stated that the figures for 1900, though obtained from a statement of that year's crop by weight, do not represent bushels of weight, but Winchester bushels on the basis of the actual weight.

resent bushels of weight, but Winchester bushels on the basis of the actual weight of the latter as nearly as it could be ap-proximated from the data at hand.

### ST. PAUL DIVIDEND. Impression Is That It Will Not Be Increased

Next Month. Roswell Miller, chairman of the Chicago Milwaukee and St. Paul Railway Company who has been on a six weeks' trip to the Pacific Coast and Alaska, returned to his office yesterday, where he attended a meeting in the afternoon of the Executive Committee of the company, at which William Rockefeller and Peter Geddes were present. Mr. Miller declined to talk about the prospect for an increase in the dividend rate upon the common stock to 7 per cent. at the the common stock to 7 per cent. at the directors' meeting on Sept. 12. He travelled outward on his trip to the West on the Canadian Pacific, and returning made a trip over the Northern Pacific. He says the people in the West are generally encouraged over the outlook for business, and that the spring wheat yield will be very satisfactory. He is of the opinion, however, that after making all allowarces the corn crop will not be better than a half crop. The St. Faul is not making any extraordinary expenditures on its property at the present time.

t the present time. Important interests close to the St. Paul management were very positive yesterday in the statement that there will be no change in the present 6 per cent. dividend rate made at the September meeting.

## NEW CAMBRIA STEEL CO. Final Merger of the Conemaugh Concern

Made in Philadelphia. PHILADELPHIA, Aug. 15. - The final merger of the property and franchises of the Cambria Steel Company into the new Conemaugh Steel Company was made to-day when stockholders of both corporations held meetings. The Cambria met first and by Policemen Corbett and O'Farrell at | decided on the merger, and the Conemaugh ratified that action. This brings into exwill be paid at the rate of 4 per cent.

pointed to arrange for the firemen's tourna-ment to be held in this village shortly in the Transvaal and the decided improve-Chief Charles A. Bayles and Postmaster Charles A. Squires of Echo nearly came to blows. Postmaster Squires tried to punch Chief Bayles in the nose. They

Mr. Herman.

"Well, there had been rumors to that effect," said Kelly.

"Rumors? Where did the rumors come from?"

"I don't know the names of the people."

"Wasn't it the duty of the police to find out under the circumstances?"

The witness didn't reply. Bernard Badennes, a druggist at \$22 Rivington street, failed to corroborate the prisoner's statement that in the drug store O'Farrell said:

"You got it for knocking out Burns." Cominsky was held.

CABMAN BEATEN AND ROBBED.

# BABY ARRAIGNED IN COURT.

Window With Five-Pound Stone.

Arthur Mostyn, the three-year-old son of Arthur N. Mostyn of 909 Montgomery street, Jersey City, was summoned before Police Justice Murphy in the Second Crimi-Police Justice Murphy in the Second Criminal Court yesterday to explain why he threw a stone through a \$2.50 window in the house of a neighbor. The diminutive prisoner who hasn't reached the trousers stage said he didn't do it and the Magistrate believed him after inspecting the stone which caused the damage. The stone weighed five pounds and the Court concluded that the boy would have to grow a good deal before he would be able to lift it.

### FINANCIAL AND COMMERCIAL.

THURSDAY, Aug. 15.
The stock market continues to reflect steady change for the better in specu lative sentiment. On practically the same volume of trading as yesterday, stocks were in the main strong throughout and final prices, which were the best of the day, showed substantial gains for practically all issues that received attention The movement as a whole can logically be considered as a natural reaction from the pronounced depression of last month. It has not as yet exceeded the limits of professional trading, nor is it reasonable to suppose that it will do so, in view of the uncertainty that still exists regarding the corn crop and the probability that public will not take an active interest in the market at this season of the year. Besides, substantial interests are unlikely to stimulate dealings, because of the circumstances just noted.

The more cheerful feeling that prevails in and about the Stock Exchange is directly traceable to more favorable crop conditions and a growing conviction that the worst of the steel strike has been witnessed Rainfalls are reported at many points all over the country, including the Ohio Valley, where they were much needed. The latest and most trustworthy revised estimates as to the probable yield of corn are somewhat larger than previous figures that have been submitted, particularly those contained in the Government crop report for the current month. In addition to these developments it is becoming plainer every day that the supply of stocks available for speculative purposes is comparatively small. This means that speculative holdings thrown over during the last month or six weeks have passed into strong hands and are not for sale at current prices.

The technical conditions of the market as disclosed during the last week or ter days, have alarmed the short interest to an extent that it is gradually reducing the volume of its commitments. At the same time, professional dealers, who hold themselves in readiness to follow the current of prices in whichever direction it may run, have espoused the long side. The transactions were fairly well distributed throughout the railway list, with fully a dozen stocks supplying sales of more than 10,000 shares. The greatest activity was in Southern Railway common, and it resulted in a net gain of nearly two points. St. Paul, Union Pacific and Atchison were conspicuous features and closed at advances over last night's final figures that averaged 135 per cent. Other stocks that received noteworthy attention were Erie common, Ontario and Western, Norfolk and Western, Atchison preferred and Southern Pacific. The net improvement in these was about a point. The less active list enjoyed such gains as 314 points in Rock Island, 5% in St. Paul preferred 25 in Chicago, Indianapolis and Louisville, 2 per cent. in Great Northern preferred and 1 and 2 per cent. in Iowa Central common and preferred, respectively.

There was a further falling off in the dealings in the United States Steel stocks. the total transactions in them being only 40,000 shares. The fluctuations in them were again narrow, and the net results of the day's trading were advances of only half a point. On sales of less than 10,000 shares, Sugar Refining advanced 21/4 points. The shares of the independent iron companies, notably Tennessee Coal and Iron, Colorado Fuel and Iron and Republic Stee issues, moved toward a higher level on very light dealings. The Tobacco issues received a little more attention than they have of late, and General Electric closed 4 points higher than yesterday. In the local traction group, Manhattan Railway was the feature, at a net gain of 115 per cent. The bond market still reflects an absence of investment buying, except demand for Consolidated Tobacco Gold 4s on the "curb." They sold at 68% and closed only a shade under that figure Other features of the outside market were Kansas City, Fort Scott and Memphis preferred, United States Reduction and Refining and Dominion securities, which

made a further advance to 67% One of the most encouraging developments at the moment is the moderate revival of interest in American securities ble views regarding American securities entertained abroad, and also to the more recent meeting of the committees ap- confident feeling that prevails regarding the reistablishment of stable condition ment in monetary conditions, as shown by to-day's weekly statement of the Bank of England. The total money market was a little firmer, presumably because of the near approach to the period when it is expected that the South and West will make demands upon this centre for funds to move the crops. Still another influence is the fact that Treasury collections keep pace with unusually heavy disdisbursements, including those made for gold received from Alaska at Pacific

Wheat gave way under the influence of logarish crop reports, lower cables, foreign selling, weak outside gearhets, liquidation, a failing off in the demand and more or less short selling. The Northwest and the southwest sold at Chica 70. The Price Current estimates the total crop at 716,000,000 bush. The Manitoba crop is estimated at 52,000,000 bush. The largest on record. An increase of 40 per cent, is estimated in the Roumanian crop, while the yield of maize is expected to exceed all previous records. The weather at the West was favorable. Liverpool declined; to 1; d. London 118 to 1341 and fiscilla 1; marks. Paris, Antwerp and Budapsat were closed. There was some recovery from the lowest prices on covering of shorts. Receipts in the Southwest continue light, but this is due party to a scarcity of cars. Seaboard clearances continue heavy. Improving crop accounts, lower cables, liquidation and an absence of support caused a drop in corn. Recent rains over the corn belt are said to have greatly benefited the corn crop. especially as the temperatures are lower. The Drorest Journal in a special report estimates the crop at 1.550,000,000 bush, and says that the Government figures are far too low. The Price Current estimates the roop at 1.550,000,000 bush, and says that the Government figures are far too low. The Price Current estimates the roop at 1.500,000,000 bush, and says that the Government figures are far too low. The Price Current estimates he crop at 1.500,000,000 bush, and says that the Government figures are far too low. The Price Current estimates he crop at 1.500,000,000 bush, and says that the Government figures are far too low. The Price Current estimates he crop at 1.500,000,000 bush, and says that the flowern estimates he crop at 1.500,000 bush, and 23.50s sales. Winter in bibs. Super fine, \$2.30 at \$2.50 a

about \$100,000. His city residence was all 57 West Seventy-second street. His wif was Harriet A. Cullen, is to have the use of his residence for life by the will and an her death almost all the rest of the estate gratto to his daughters, Adele Martin, vife of Henry Wallace Martin, Hattie M. Cullen, and the three children of the son, Thomas H. Cullen, Jr. To the son only \$100 was left.

Williamsburg side parted yesterday just after a girder had been stretched from AMSTERDAM, N. Y. Aug. 15.—Mrs. Frank
Rehberg, 32 years old, died to-day from
the effects of taking an ounce of wintergreen for medicinal purposes. She had
been suffering with rheumatism of the
boart.

The shocks and
tackle collapsed and with the ropes dropped
to be street. The mass landed on a street
wooden shed and partly demolished it
Nobody was injured.
